

General Information

BALVER TIP cleans and tins solder tip in one step. **BALVER TIP** is produced without using hazardous material. By correct use it has low odor and less smoke. Short dipping of solder tip is enough for fusing **BALVER TIP** and reducing the oxides by tinning the solder tip at once. After cooling down **BALVER TIP** solidifies again. The product is lead-free and absolute useable for lead-free applications. Before use it is recommendable to remove residues of former used cleaning agents.

Technical information and Data Sheets can be found on our website (www.BALVERZINN.com). You can also obtain all information and documents directly from **BALVER ZINN**.

BALVER ZINN Production Programme

The **BALVER ZINN** production programme also includes solder bar, solder pastes and flux. In addition to the **SN100C**[®] product family, **BALVER ZINN** offers other unpatented and patented solder alloys for wave soldering, reflow and rework.

Product properties

- No dangerous, chemical properties
- Lead-free
- Low smoke
- Less odor
- Easy to use

Delivery Size

ca. 25 g per can

Packaging

Can

Storage Conditions / Durability

Dry at room temperature / minimum 2 years shelf life.

Safety Advice

Before use please refer to the Safety Data Sheet.

Although the information in this data sheet is considered accurate, the measured values do not represent assured properties or delivery specifications. Because of the wide range of potential materials and applications, and with respect to possible protective rights and third parties, Balver Zinn Josef Jost GmbH & Co. KG **cannot** accept any liability.
